

■ C.V. Joint Banding Tool (with cutter)

- TOPTUL C.V. Joint Boot Banding Crimping tool is used to install and tighten the band-it and strap style clamp on CV joint boots, power steering rack and pinion steering gear boots.
- Bands are installed into the tool and tightened by turning the tool handle.
- Use a 1/2" socket/wrench or by hand to wind the band until sufficient tension is applied.
- When boot clamp has been tightened to specs, the built in cutter cuts the band by flipping tool lever (at the front of the tool) forward.
- Tool is easily removed by sliding sideways after the band is tightened.
