Installation

Sadle clips 50 pcs S15006

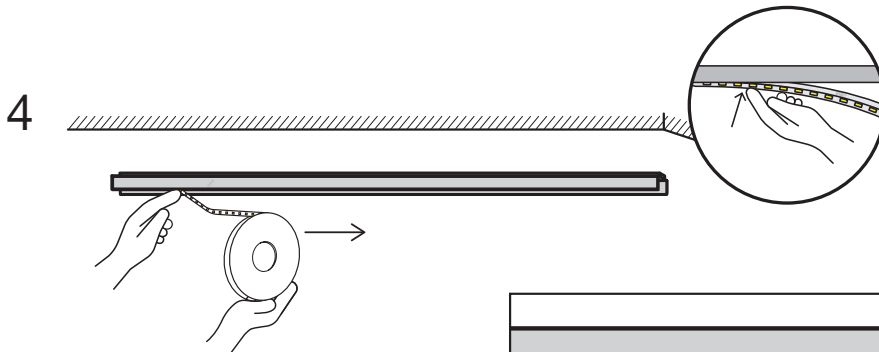

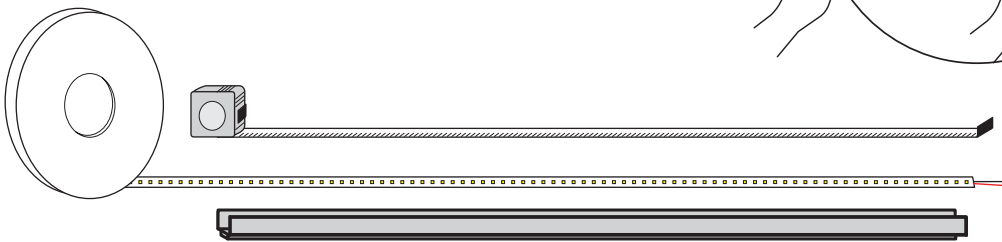

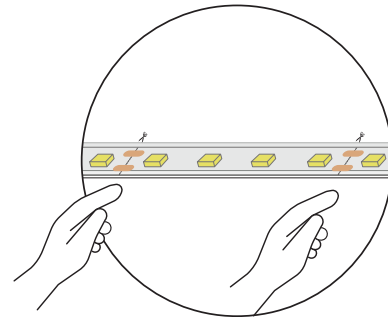

Installation

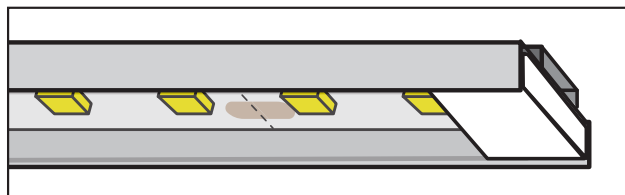

Profile S40142

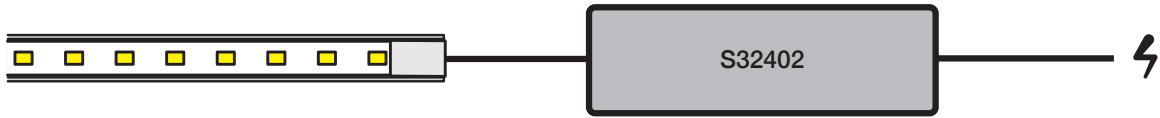

3 Measure the profile and adjust the LED strip to ensure it aligns with the cutting points. See the previous page for instructions.

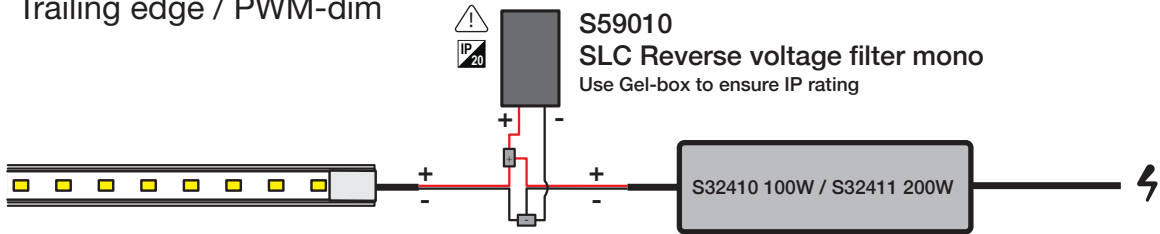

Press the LED strip firmly into the profile. The adhesive tape is not required for this installation.

5 Connect the driver.
Non-Dim

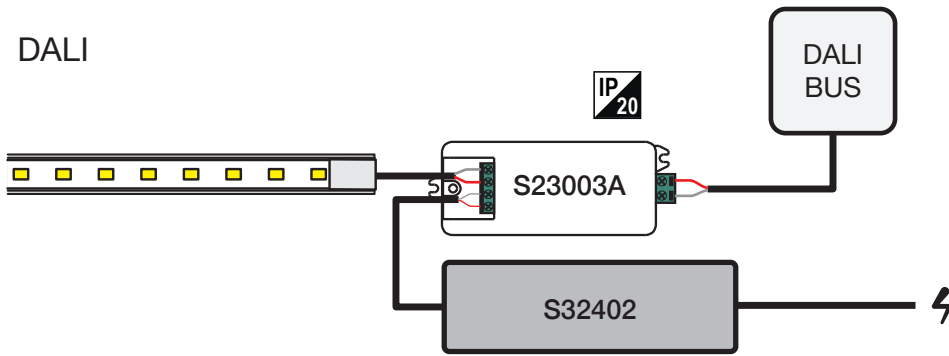

Trailing edge / PWM-dim

Warning: Reverse voltage filter required for dimming.
The SLC Controller S23003A has a built-in reverse voltage filter.
If using other controllers, make sure they have this, or use the SLC S59010 Reverse voltage filter. Without such filter, reverse voltage oscillation from PWM dimming can occur and damage the LED strip. The product warranty will be void.

DALI

6 Always test the LED strips after installation to ensure everything is working as intended.
